Summary: Experienced Software Engineer with **3+ years** in **Full –Stack development**, specializing in React JS for front-end development, Node JS for server-side processing, and .NET for scalable and robust back-end solutions. With a strong foundation in full-stack development, I excel at creating seamless, user-centric applications and architecting solutions that meet complex business requirements. My expertise spans modern web technologies, ensuring high-quality, maintainable, and performance-optimized software delivery. Seeking a challenging role in a dynamic organization to leverage my expertise and contribute to company growth.

PROFESSIONAL EXPERIENCE

Deltek Inc.

May 2021 – June 2024

Software Engineer II

- **Language and Technologies Used:** React JS, Node JS, Core JS, Jest, Ember JS, C#, ASP.net, SQL, Visual Studio, DBever.
- **Project: Polaris PPM- Project Portfolio Management Software**
- **Responsibilities:** Implemented new features, fixed bugs, and ensured application robustness through comprehensive unit and automation testing. Designed and developed Project Requests and Portfolio modules with real-time data integration using service call in the backend.
- **Project: Polaris PSA- Professional Services Automation Software**
- **Responsibilities:** Developed a robust implementation utilizing feature flags, enabling features to efficiently handle increased loads while improving maintainability and scalability. Implemented Resource management, Clients, Projects, and billing modules with advanced features like resource rate, billing, expenses and real-time data integration using service call in the backend. Integrated Polaris PPM and Polaris PSA by seamlessly merging features into a unified solution, enhancing efficiency, ensuring robustness, and driving customer satisfaction.

Singsys

Sep 2020 – Dec 2020

Software Engineer:

- Developed user interfaces using React and Vue.js based on provided designs, enhancing user experience and boosting customer satisfaction scores.

Machstatz

June 2020 – Aug 2020

Data Visualization Engineer Intern:

- Contributed to a project as a frontend developer used Angular 9 and React JS during development.

SmartData Enterprises Inc.

Jan 2020 – March 2020

Software Development Intern

- Developed and maintained web applications using **Angular** and **Node.js**, improving user interaction by 25%.
- Assisted in debugging and troubleshooting issues, improving system performance by 15%.

PROJECTS

Project Scribe: Angular

- This social networking project allows users to create profiles, connect with friends, and build their network. It was developed using AngularJS for a dynamic front-end and Firebase for real-time database and backend services.

Let's Learn Together – Android

- This Android application is designed for use within educational institutions to bridge the communication gap between students and faculty members, fostering seamless interaction and collaboration.

SKILLS
